Circular Fertiliser market

Hybrid interactive session for consumers

19 February 2021 at 12:00 CET (Brussels timezone)

REGISTER [HERE](#) TO CONNECT TO THIS HYBRID SLOT!

Circular fertilisers help us protect our soils and ecosystems, decrease EU dependence on fertiliser imports, and improve resource efficiency. The adaptation of the existing technical and legal framework as well as targeted support to innovation on nutrient recycling, will facilitate the broader use and production of circular fertilisers (CF) across Europe. Circular fertiliser producers, farmers, civil society organisations, academics, and policymakers will come together at the final event of the Horizon project FER-PLAY to get to know project results and to discuss the current state and future of circular fertilisers in Europe. This interactive session will explore CF, covering their benefits, safety, and market readiness. Experts will discuss how public authorities can support CF production and whether they are legally available and cost-competitive. Short presentations and Q&A will provide insights for consumers, retailers, and local administrators.

Speaker

Moderator: Ms. Bera
Mr. Werner Vo

Time	Title
12:15 – 12:25	Welcome
12:25 – 12:35	What are circular fertilisers? Are there benefits for the soil? (3 minutes + Q&A)
12:35 – 12:45	Ok, they're nice – but safe? (3 minutes + Q&A)
12:45 – 12:55	What public authorities should do to start producing CF? (3 minutes + Q&A)
12:55 – 13:05	Are CF on the market? are they cheaper than conventional? (3 minutes + Q&A)
13:05 – 13:15	Wrap – up and close
